Digital Space Meets AWS Migration Acceleration Partner (MAP) Criteria

Announcement

What does AWS Migration Acceleration Program Partner Status?

The AWS Migration Acceleration Program Partner Status is an extensive independent audit for AWS Partners designed to test and validate cloud capability and expertise. The program reviews project and technical competence needed to safely and predictably migrate and optimise customers environments in AWS cloud.

The AWS Migration Acceleration Program Partner Status validates that Digital Space meets the high bar criteria of this program demonstrating a track record of customer success, and program controls. This assessment covers the full lifecycle of a cloud migration:

Discovery: Existing infrastructure assessment, business case rationale and project requirements

Planning: Solution architecture, resilience, security, project plan, resource and skills planning

Delivery: Environment configuration, migration sprints, data transfer, project management, testing's plan.

> " I'm extremely proud of our team's hard work in achieving this globally recognised validation for our migration expertise. This further sets our team - and Digital Space as a whole - apart as an AWS focused practice capable of consistently delivering high-quality migrations that bring tangible value and benefits to our customers."

Peter Male
AWS Director at Digital Space

What benefits does the AWS Migration Acceleration Program Partner Status unlock for your organisation?

Digital Space's attainment of this program further re-enforces evidence that you can be confident you are working with a partner who can accelerate your cloud journey, unlocking maximum benefits from adopting cloud!

By partnering with Digital Space for your Cloud Migration, your business can:

- Develop an accurate and predictable business case and migration plan to adopt the advantages of Cloud

- Have peace of mind that Digitial Space has expertise and knowledge that has been heavily vetted by AWS

- Leverage the combined team of Digital Space and AWS to help you negate financial obstacles to cloud adoption, maximising savings.

- Injecting pace to go further and faster with Digital Space's trusted Cloud Centre of Excellence team's unique skills integrating with your business.

Migration Acceleration Program Partner Status - Completing the Capability Triangle

Digital Space's AWS cloud expertise and continuous skills investment is highlighted by 3 key pillars, audited by AWS:

Strategic Collaboration Agreement: A unique, joint agreement between Digital Space and AWS to strategically work together developing skills and innovation to help customers achieve competitive differentiation through cloud services.

Migration Acceleration Program Partner Status: The vetted program demonstrating Digital Spaces expertise in planning and delivering customer cloud adoption programs

AWS Managed Service Competency: Another AWS audited program where Digital Space demonstrates the skills and expertise to manage a customer cloud environment maintaining operational efficiency, cost control, and optimisation.

At the start of this year (2024) Digital Space signed a **Strategic Collaboration Agreement** with AWS to increase reach and capability helping customers to modernise applications, maximise data insights, and enhance customer experience through a combination of AWS's services and Digital Space's expertise.

To complete the triangle, Digital Space also has been an AWS Managed Service Competency for 5 years. Digital Space has experience in providing end-to-end AWS solutions to customers at any stage of the cloud journey, including planning and design, building and migration, operations and support, and automation and optimisation.

The collaboration of the AWS Migration Acceleration Program Partner Status, AWS Managed Service Competency, and Strategic Collaboration Agreement recognises Digital Space as an AWS partner that can go test the limits of innovation and go above and beyond to deliver Operational Excellence to your Cloud Migration Projects.

> I am delighted that our Cloud Centre of Excellence has met the high bar achieving Migration Acceleration Program Partner Status. It is testament to our cloud technical team's long-standing passion, expertise and experience in cloud migrations.
>
> This validation further helps customers confidently select Digital Space as their cloud migration partner safe in the knowledge that we will help them go further and faster driving cost benefits, operational efficiency, and ultimately competitive differentiation."

Jon Portlock
Cloud Services Director at Digital Space

A Recent Cloud Migrations Project

"At the outset of our cloud transformation journey, we explored our options. We chose Digital Space to lead our initial cloud discovery exercise, which instilled confidence and trust in their expertise and proven track record. Adopting AWS through Digital Space has significantly enhanced our data accessibility, business resilience, and security posture. This transition has empowered us with enriched data insights, promptly utilised to enhance our valued customers' experiences. We eagerly anticipate continuing our cloud transformation journey with Digital Space."

Jon Milne
Technology Director at Eastlight Community Homes
